## Message from CEO

It has been an action packed six months from October 2021 to March 2022. At AIC-Nalanda we have onboarded a fresh set of start-ups from across multiple sectors. Surge 2.0 has been an integral part of this period. We have created and actioned an interesting program StartConnect. A program that connects our start-ups to their customers, directly through several interesting and engaging programs. We have made the first move of connecting the dots from product / service launches to connecting with the customers. So, how can a critical aspect of the ecosystem be left behind: Fundraising! AIC-Nalanda has kickstarted an Investor Connect program and in January 2022 we had a few of our investment ready present their products, services to a few investors

With Enterprise Odisha we connected with the startup ecosystem of the state and with MSMEs too!

We are confident of having another great 6 months and will make progress on all fronts!

Thank you for being part of the ecosystem and for all your encouragement!

**Mr. Devjyoti Mohanty**

Chief Executive Officer

# New Onboarded Startups

## Medxpress

Medxpress is an Odisha based B2B healthcare start up and it aims to transform patient experiences in underserved markets. Our goal is to provide high quality and affordable services via Pharmacists to the rural populations. To digitally revolutionize the system and create a platform for the retailer to connect to multiple doctors, diagnostic centers and hospitals for consultations and bookings.

## LOCALITY ONE

As there is an increase in costs of workforce and the difficulty to maintain the work schedule, tasks and the reporting products, Idijithali's product "Locality One" is an one stop solution for gated community management. It helps to make all the processes digital and reduce the headache of maintaining records from different places and then find them to analyse them.

## Pallvicare

Pallvicare is into the health & wellness segment. It aims to incorporate diagnostics, homeopathic treatment as well as psychological & lifestyle counseling on a single digital platform. Currently the online & tele homeopathy and psychological counseling part are active. Our services also include homeopathic medicine delivery as well.

## Betabuilds

OffWallet is a patent granted, SaaS based, B2B platform, that aims to enable the existing bank Apps, Digital Wallets, Android based PoS terminals, Micro ATMs, Payment Gateways to empower their end users to transact money through mobile safely without the need of the internet seamlessly with rich user-experience. Works on Android smartphones just a machine to print products, but it is also a money-making model.

## GreenOvations

GreenOvations is a one stop solution to your organic and eco-friendly lifestyle which truly believes in creating a hassle free society and a healthier India. With a vision of making people easily adopt organic and eco-friendly products, GreenOvations aims to remove the single use plastics and in-organic products by 2030, making it a lifestyle which gives back to Mother nature.

## Gumfert

Gumfert is an Electric Vehicle Manufacturer who is focusing on designing, engineering & producing electric vehicles (all segments) & in-house built EV components for global automotive industry.

## Chef Junction

Chef Junction is a homemade food delivery platform from where a customer can order hygienic food which is prepared from scratch in home kitchens of handpicked Home Chefs of the city, through Chef Junction app available on Play Store and App Store.

## Imaginxt

Our mission what drives us to make technological and innovative products that redirect to the future and facilitate people to enjoy the convenience of technology. Team Imaginxt is committed to revolute the 3D Printing industry by simplifying the printing process and availing the largest cloud content library. Our 3D Printer and business model is based on "how to work faster and smarter". Our 3D Printers are not only just a machine to print products, but it is also a money-making model.

## New Onboarded Startups

### OrderPlz

OrderPlz is an On-Demand logistics based startup, that acts as an intermediary between merchants and the prospective buyers who wish to get products from local merchants delivered at their doorstep. Putting up the menu of the hotels & restaurants on a single digital platform (Website & Mobile Application) has made the unstructured ways of viewing of food menu very structural.

### Braga Chicken

Braga Chicken is a Meat Processing Brand promoting neat and clean, hygienic, fresh chilled Chicken for retail consumers and also is the only manufacturer of Frozen chicken in Odisha till now. They are also working towards poultry waste management in Bhubaneswar.

### Transport Simple

TransportSimple builds simple, advanced & economical business solutions for fleet owners and transporters globally to manage operations and accounts. With solution as base, it provides a one-stop solution for valuable services as a marketplace, e-commerce, IoT to the customers and analytics-driven services to multiple stakeholders.

### Homvery

At Homvery they keep people's home well-maintained by providing maintenance & upkeep services like Electrician, Plumber, AC Repair, etc. in tier 2 and 3 cities.

### Adloons

Adloons aspires to offer one-stop solutions to all advertising and branding necessity across prime locations in the country. Having strong belief in cutting-age technologies, Adloons foresees to make advertising and brand-building process a straightforward, easy and simple negotiation between clients without any hassles.

### Jigyasu

Jigyasu brings the Science textbook concepts/examples/questions/explanations to real life experience of the students. They have designed about 600 experiments for Grades 6-12 with multiple variations in each experiment, designed and curated in a manner that the science concepts are Learnt By Doing and can be plugged into all types of National & International Board Curriculum. They offer this through a Science Studio program, a space in private/govt schools for learning and exploring science with active visualization and hands-on experience.

### Hire an Hour

Hire an hour is an aggregator of Service Providers to make available well groomed, professionally trained and background verified Maid, Cook, Driver and Patient attendant in hourly basis on real time.

### Secure Solutions

Security with software is incomplete as full control is not possible. Full control is achieved through hardware intervention at the grass root. The team at Secure Solution are working on a mechanism of applying quantum variable with hardware intervention at the day to day edge devices.

### Venticook

Venticook has designed the most affordable and first ever mechanically controlled forced draft biomass burning stove in the world that is specially built for the rural population and aims to tackle indoor air pollution and its aftereffects.

## Arthayan | Funding Demystified

This workshop aimed to guide startups who are looking for funds in near future. Top VC firms delivered lecture series and introduced major aspects of fundraising to these startups. 10 of our incubatee enrolled in to this.

**Arthayan PRESENTS FUNDING DEMYSTIFIED** | POWERED BY **MIXPANEL**

**Funding Landscape in India**  
Raviish Risham Managing Partner, PointOne Capital

**Importance of timing**  
As a follow-up to the earlier slides, show how all the above brought the tides in your favour.  
Great businesses die for lack of timing, average businesses can flourish by existing at the right place at the right time.  
Are you a business borne out of COVID or social justice or a disruptive market need? Both these. Showcasing this urgency could accelerate the understanding and further action of any prospective investor.

**vinssi**  
Gifting Redefined

**Vinssi Gifts & Novelties Pvt. Ltd.**

Founded in the year 2017 as a proprietorship firm the venture brought with it a kitty of wall decorative items, each one carefully designed and prepared by the co-founder of Vinssi Mr. Partha Roy. He left behind his rich & lucrative career in education to join the founder Ms. Namrata Mitra in her ad-venture. Slowly the couple tried their hand on corporate gifts & mementos. Very next year they tasted success as their design was selected for All India Endocrinology Conference. It was a turning point and there was no looking back since then. Soon Vinssi became a sought after name in all major conferences in Eastern India. When Covid played a spoil sport they started looking for new avenues. As of today they are incorporated as a Pvt. Ltd. Company and all set to launch a host of electronically integrated products, especially decorative luminaries that boasts of its uniqueness of transforming Indian arts into illuminated forms.

"Problem understood best when faced" - they were their first client. TransportSimple is a startup built with a decade of industry experience and a vision to address challenges faced as a fleet owner, transporter, and freight forwarder across the globe.

The logistics industry works on low margins and has complex daily activities. The complicated accounting applications reduce owner visibility, and it is challenging to create exhaustive excel sheets, reducing the scope of cost-cutting further. In addition, the industry uses multiple tools to get work done, reducing data-driven decision-making. The rising investment in the marketplace, load board, telematics, etc., is bringing advancement to the industry but, unfortunately, not to the stakeholders.

TransportSimple is empowering their clients with their flagship easy-to-use and analytics-powered solutions that help them do operations, accounts, documentation, tracking, and more. Our partner integrations help provide load board, marketplace, trip credit, insurance, and more directly via TransportSimple to the client when they need it. We reduce the learning curve and increase the industry potential.

A unique amalgam of Fleetio, Trivago, and a marketplace to the industry, which raised \$1B+ in less than a year and was valued at over \$20B+ with prominent names like Fleetx, BlackBuck,

Our incubatee **TransportSimple** got featured in Startup Odisha's Coffee Table Book 2022 edition

LocoNav, and more, TransportSimple was first launched in June '20, got over 500 users and 130+ paying customers, growing 15% MoM.

To provide essential services to our customers, they have also partnered with OEMs, Insurance Companies, NBFC, Load Aggregators, and more and are currently increasing their footprint outside of India in Qatar, and UAE.

Our incubatee **Vaisali Dairy**, a tech-enabled and hydroponics fed dairy farm inaugurated their **New Processing Plant of Milk Products** in august presence of **Shri Surjya Narayan Patra**, Hon'ble Speaker, Odisha Vidhan Sabha and **Shri Chandrasekhar Sahu**, Hon'ble Member of Parliament, Berhampur.

AUUM Platforms is a startup based out of the Temple City of India, Bhubaneswar. They work on bringing products which can suit the needs of enterprises as well as consumers harnessing the capabilities of emerging technologies. Their team began with Safe India hackathon organised by Software Technology Parks of India back in March 2020. They finished in the top 10 in the hackathon, and as they wanted to take their ideas & products forward they incorporated their startup AUUM Platforms on 11th of November 2020.

The product, SWASNER PPE is a next generation PPE which can provide the best protection in an environment, and is fashionable. The product can be super beneficial for healthcare warriors, servicemen like airline personnel, railway personnel and can be safe for students to use also.

**Societal Relevance**

The innovation helps preventing acute respiratory diseases and protects from direct exposure or physical contact with viruses.

The PPE designed by AUUM Platforms is a next level protective gear for the vulnerable workers, frontline police personnel and people exposed to air borne diseases.

Their vision is to simply be one of India's premier technology company, creating products which harness the best of emerging technologies like Internet of Things(IoT), Blockchain technology, automation, artificial intelligence, robotics, augmented reality (AR). Their products will cater to the needs of both consumers as well as enterprises. They also believe to help achieving at least 4 United Nations SDGs and dream to be the torchbearer in helping India achieve sustainable growth.

**Major achievements/Awards/Recognitions**

- Recognised by Startup Odisha Hall of Fame
- Recommended by Dept of MSME for Govt Procurement
- Innovation acknowledged by Education Minister
